

PROTECT & SUSTAIN **PRODUCT STEWARDSHIP POLICY**

Fauji Fertilizer Bin Qasim Limited is committed to achieve excellence in fertilizer manufacturing by implementing international standards of health, safety, environment and security throughout all facets of its processes to ensure that proper care is taken along the whole value chain including but not limited to raw material acquisition, production and transportation of finished products.

We aim to achieve our goal of a robust product stewardship with coordinated and consistent efforts in,

- Material sourcing,
- Safe and secure production,
- Better contractor management,
- Storage & distribution and
- Stakeholders' awareness under guidance of International Fertilizer Association - IFA's Protect and Sustain Program.

Our ongoing process safety management PSM implementation program and a drive to adopt responsible care program RC 14000 is a testimony of our commitment for a safe environmental friendly and secure production facility. We are moving steadfastly to ensure continual improvement through innovation and teamwork, adhering to already adopted quality, environment and safety management systems ISO 9001, 14001, 45001 and IFA's Protect and Sustain – Product Stewardship Policies and practices.
